

RIGHT ACCORD

Private Duty-Home Health Care

Parkinsons Disease

- Nearly one million people in the U.S. are living with Parkinson's disease (PD), which is more than the combined number of people diagnosed with multiple sclerosis, muscular dystrophy and Lou Gehrig's disease (or Amyotrophic Lateral Sclerosis). This is expected to rise to 1.2 million by 2030.
- Approximately 60,000 Americans are diagnosed with PD each year.
- More than 10 million people worldwide are living with PD.
- Incidence of Parkinson's disease increases with age, but an estimated four percent of people with PD are diagnosed before age 50.
- Men are 1.5 times more likely to have Parkinson's disease than women.

The combined direct and indirect cost of Parkinson's, including treatment, social security payments and lost income, is estimated to be nearly \$52 billion per year in the United States alone.

Medications alone cost an average of \$2,500 a year and therapeutic surgery can cost up to \$100,000 per person.

How Our Home Care Team Can Help

5 Step Solution Includes:

STEP 1 - ASSESSMENT / EVALUATION -

RIGHT ACCORD will conduct a thorough Care Coordination with Hospital or Facility Team to ensure safe discharge to home

STEP 2 - DEVELOP A COMPREHENSIVE PLAN OF CARE -

with an RN led team, RIGHT ACCORD will develop a comprehensive

STEP 3 - CAREGIVER/CLIENT TRAINING -

wellness training and education of client, family and caregivers on disease process, early warning signs and symptoms and reduce complications.

STEP 4 - COLLABORATE WITH OTHER HOME HEALTH CARE TEAMS -

RIGHT ACCORD will work side by side with other disciplines in the home care team such as RN, PT, OT, RT to maximize activity tolerance, safety and improve outcomes

STEP 5 - FOLLOW UP VISITS /

REASSESSMENTS - nurse led team will reevaluate plan of care, ensure physician follow up and prevent complications.
